

Technical Sheet

SIMPSON

Strong-Tie

AKR

Reinforced Angle Bracket

The AKR bracket is reinforced around the bend, which significantly increases the rigidity and strength of the bracket.

- One-piece connector.
- Reinforced corners provide enhanced performance.
- CNA nails must be used to achieve the published loads.

Features

Material

Steel:

S 235JR acc. EN 10025

Corrosion protection:

Hot dip galvanised after fabrication acc. to EN ISO 1461 - zinc layer thickness approx. 55 µm

Benefits

- Load capacity in all directions
- Full and partial nailing
- Single or double sided connections
- Optional mounting with a distance to the support, only for tension connections
- Optimised bolt utilisation

Applications

Header member

Supporting member:

Concrete, steel

Supported member:

Timber, engineered wood

Applications

- The AKR angle brackets enable optimised connections between timber and other materials, like concrete, steel, etc.
- According to their overall galvanisation the AKR angle brackets could be used in outdoor areas

AKR Reinforced Angle Bracket

AKR285LG	285	85	65	4	26	3	2	1	-	1	0.72

Further below you will find the load values for these nail patterns: Full nailing, Partial nailing and nailing to a column.

Further connection options are given in the according ETA.

AKR Reinforced Angle Bracket

Installation

Fixing

- Fasten onto timber members with CNA4,0xl threaded nails or optional with CSA5,0xl screws and to concrete / steel with bolts M12 and a washer Ø24.
- Single or double sided connections are possible.
